L1: Entry 8 of 8   File: USPT   Jun 4, 2002

DOCUMENT-IDENTIFIER: US 6401079 B1
TITLE: System for web-based payroll and benefits administration

Detailed Description Text (290):
For each employee and contractor in the payroll group for the pay period, the table displays information including: name, total hours worked, regular hours worked, hours per each Employer-defined paid-time-off schedule (e.g., sick, vacation, personal, holiday), Form 1099 hours, calculated overtime hours, and status indicators showing (i) whether the employee's timesheet is approved and (ii) whether the employee's paycheck is approved. Clicking "Approve All Timesheets" button 4425 causes the system to approve all individual timesheets for the pay period for the employees and contractors in the selected payroll group. Similarly, clicking "Approve All Paychecks" button 4430 causes the system to approve all individual paychecks for the pay period for the employees and contractors in the selected payroll group. The system requires that an employee's timesheet be approved before the employee's paycheck can be approved, and that the paycheck be approved before the paycheck can be printed (or deposited electronically). Note that the Employer can set security levels to control approval of timesheets and paychecks.
